

HOW TO DISABLE SAMESITE COOKIES IN GOOGLE CHROME

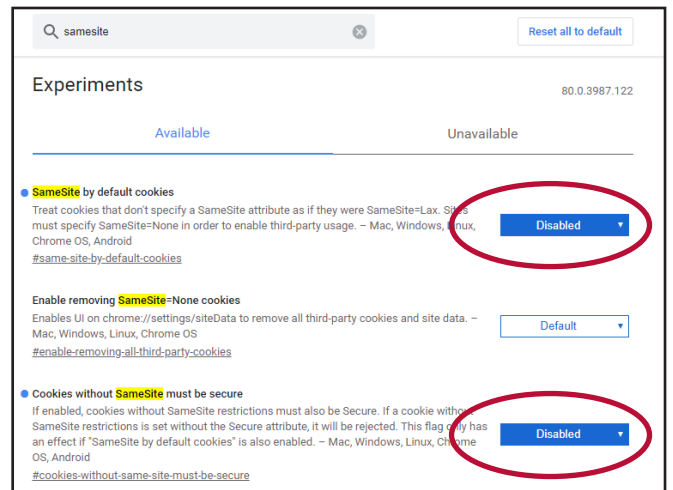

1 In a new Chrome browser window, enter "chrome://flags" in the URL bar.

Then, in the search bar at the top, type "samesite."

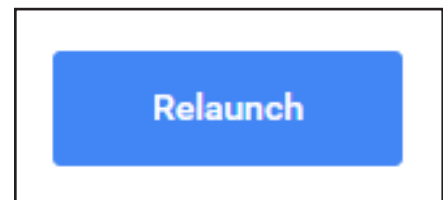

2 Change the following two settings to "disabled."

- SameSite by default cookies
- Cookies without SameSite must be secure

3 Click the "Relaunch" button in the lower right of your window.

PLEASE NOTE

- Once you relaunch, you may lose access to some applications in open browser windows and need to re-login.
- Disabling these settings *might* affect other websites. Disable at your own risk.
- In order to protect the security of your computer, you should reset these settings once you've been given the go-ahead that these new Google Chrome features are functioning correctly with U Market and EFS.
